

Pars Land

About Us

PARS LAND Company is proudly one of the pioneers in the production and distribution of high-quality black garlic in Iran. With the expertise and experience of our team, and using the best processing methods, we offer black garlic with unique taste and health benefits to the market. Our black garlic is produced through natural processes without the use of harmful chemicals, preserving its medicinal properties and promoting the health and nutrition of our valued customers. Our mission at PARS LAND is to provide healthy, high-quality products to our customers.

The image shows several black garlic bulbs. Two are cut in half, revealing dark, almost black, segmented cloves. The background is a warm, golden-brown color, possibly a wooden surface. A semi-transparent circular graphic with a gold border is overlaid on the left side, containing the text 'Features and Uses'.

Features and Uses

Black garlic is a type of garlic produced through a fermentation process. This process alters the color, taste, and properties of garlic. It turns black or dark brown, has a sweet, mild flavor similar to syrup, and lacks the usual pungency of fresh garlic. Its texture is soft and chewable. It is used in dishes, salads, food garnishing, making special sauces and seasonings, and adding to cooked foods such as soups and stews. It should be stored in a dry, cool place. Black garlic has high nutritional value, but its production process is lengthy, making it more expensive than regular garlic.

Pars Land

1. Powerful Antioxidant: Reduces oxidative damage in the body.
2. Boosts Immune System: Helps fight diseases.
3. Lowers Blood Pressure: Aids in reducing blood pressure.
4. Heart Protection: Reduces cholesterol and improves heart health.
5. Improves Liver Health: Supports better liver function.

Properties & Benefits

- **SUPERIOR QUALITY:** USING THE BEST RAW MATERIALS AND PRODUCTION PROCESSES TO ENSURE PRODUCT QUALITY.
- **HEALTH AND SAFETY:** PRODUCING HEALTHY, HYGIENIC PRODUCTS WITHOUT HARMFUL CHEMICALS.
- **INNOVATION:** LEADING THE WAY IN MODERN METHODS AND CONTINUOUS IMPROVEMENT OF PROCESSES.
- **CUSTOMER SATISFACTION:** GAINING THE TRUST AND SATISFACTION OF OUR CUSTOMERS BY OFFERING HIGH-QUALITY PRODUCTS AND SUPERIOR SERVICE.

OUR VALUES

Pars Land

Black Garlic

Packaging Types

- **Glass Packaging:** Sturdy, sealed jars that preserve freshness, prevent air from entering, and protect the garlic from moisture and contamination, making them suitable for long-term storage.
- **Plastic Packaging:** Lightweight, sealed plastic packages that are easy to open and close, ideal for home use and daily consumption.
- **Vacuum Packaging:** Black garlic in vacuum-sealed packaging removes air from inside, preserving the product's freshness. This packaging is also ideal for export and long-term storage.

Our Commitment

At PARS LAND, we are committed to our obligations to our customers, employees, and the environment. By providing healthy and delicious products, we help improve your quality of life and are constantly striving to bring the best to you.
